

Redmine - Defect #7039

CSV export. Line breaks. Excel

2010-12-03 20:16 - John Yani

Status:	Closed	Start date:	2010-12-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.0
Resolution:	Wont fix		
Description			
When I make csv export of issues and open the result in Excel, line breaks (CR/LF) in description field are not correctly displayed.

History

#1 - 2010-12-03 20:17 - John Yani

Open Office Calc BTW handles it fine.
Excel version: 2007

#2 - 2011-02-10 17:34 - Jonas Schulz

Please review this bug, it is still open in version 1.1. The CR/LF issue in the description field will prevent the correct import under excel 07.

Are there any other chance to drop out that field without modification of the issues_helper.rb?

Thank you in advance!

#3 - 2011-02-18 16:53 - Etienne Massip

- Category set to Issues
- Affected version (unused) set to 1.1.0
- Affected version set to 1.1.0

#4 - 2011-03-22 17:30 - Etienne Massip

- File Classeur1.csv added

Data of cells containing line breaks in Excel 2003 is outputted the following way in the resulting CSV file :

- cell content is surrounded by quotes
- line breaks are LF only

Here's an example (separator is semi-colon).

#5 - 2011-03-22 17:31 - Etienne Massip

- Target version set to Candidate for next major release

#6 - 2011-03-26 16:34 - Etienne Massip

- File csv_issue_description_eol.patch added
- File csv_text_fields_eol.patch added

2 patches :

1. either simply replace \r\n EOLs with \n in issue description (IssueHelper change)
2. or replace \r\n EOLs with \n in all text fields (FasterCSV change)

#7 - 2011-03-27 19:39 - Jean-Philippe Lang

- File *Classeur1.csv* added

- File *excel2007.png* added

Works fine for me with Excel 2007. The same file with CRLF and what it gives in Excel 2007:

	A	B
1	Test	titi
2	123	toto
		CEPICHJEP cpjcpr
3	45613	ezc =>
4	234	dede
5		

#8 - 2011-03-27 22:50 - Etienne Massip

Gosh, right.

Excel 2003 renders the `\r` with a square character inside the cell :/

So that's basically an Excel version support question...

#9 - 2011-03-28 09:19 - Etienne Massip

Jonas, could you post a sample of a non-working Excel 2007 workbook, please ?

#10 - 2011-03-28 16:04 - Etienne Massip

- Target version deleted (Candidate for next major release)

#11 - 2011-04-28 17:58 - Rolf Stetter

- File *excel2010.png* added

Jean Philippe,
this is the result with Excel 2010 when opening your sample CSV:
excel2010.png

#12 - 2011-04-28 18:01 - Etienne Massip

Just raise the height of line 3.

#13 - 2011-04-28 19:10 - Rolf Stetter

ups.. you are right!
So, I am very interested in getting your fix released..
Don't want to start patching.

#14 - 2011-04-28 19:27 - Etienne Massip

This issue should probably be closed as a "Won't fix" since Excel \geq 2007 opens Redmine exported CSV files containing EOLs just fine and supporting old Excel 2003 seems quite unnecessary now.

My patch simply replace CRLF inside column data with LF so it can be opened with Excel 2003.

#15 - 2011-09-09 14:45 - Sven Müller

In [german Wikipedia](#) there is a hint:

Trennzeichen ist stillschweigend Semikolon, wenn die CSV Datei nach ANSI-Norm gespeichert ist

Trennzeichen ist stillschweigend Tabulator, wenn die CSV Datei in Unicode-Format gespeichert ist

The delimiter semicolon is expected when file is in ANSI.
The delimiter TAB is expected when file is in Unicode.

So is there a way to configure Redmine, to select either comma or semicolon for cvs files?

#16 - 2011-09-09 15:42 - Sven Müller

- *File faster_csv.rb.patch added*

I#ve tried to path one file. But in exported.csv are still comma

Any idea why?

#17 - 2011-09-09 15:44 - Etienne Massip

Did you read the issue description?

#18 - 2013-01-13 17:07 - Ikon Ikon

Hello guys,
still problems for me in Excel 2010. You need to do this:

*Use ";" to separate fields (column separator)

*Use CR+LF for line break out of text fields (row separator)

*Use LF for line break inside text fields (these are line breaks that will break cell text on multiple lines)

In that case, Excel will be happy. Tell me please the script to edit in order to fix the bug.

Thanks!

#19 - 2013-01-24 13:07 - Sergey Prosin

Hi, Ikon.

To fix column separator you could edit your regional settings in folder \config\locales. Keep in mind the language you use in interface. Tha name of parameter is general_csv_separator. I'm not a redmine expert ;) so I'm not informed about solutions of line breaks, but may be you could find somethind in these files too.

#20 - 2013-12-27 08:10 - Doan Phuoc

Hi all,

I used redmine 2.3.3 and i can't fix it. May be help me.

I want export csv whith vietnamese language.

Thanks

#21 - 2015-04-18 05:52 - Toshi MARUYAMA

- *Status changed from New to Closed*

- *Resolution set to Wont fix*

I agree.

CSV character encoding in this issue is duplicate of [#11116](#).
