

Redmine - Feature #7043

Give user ability to generate changelogs

Target version:	
Resolution: Fixed	
Description I've seen software like Jira and whatever else have this feature, and then I thought, this is actually a very useful feature, and Redmine should have it too. The ability to generate Changelogs from select version to version. Takes much of the hard work out of copy and pasting all the SVN changes manually, and makes it quicker to write your own Changelog, since you have the changes.

And how would you do that? (Just tried, don't see any way to do it)

- *Status changed from New to Closed*

- *Resolution set to Fixed*

The feature has been implemented for the upcoming Redmine 5.1.0 ([Feature #36679: Export a version as changelog text](#)).
