

## Redmine - Feature #7111

### Expose more detail on journal entries

2010-12-14 17:12 - Jamie Cockrill

#### Description

It would be useful to be able to query additional information about journal entries over the REST API. At the moment I am trying to find the best way of retrieving the date on which a particular journal-entry was created. This could be done in one of two ways:

- Create a separate 'journals' read-only/GET-only REST method that allows you to query for specific journal ID's and returns info from the *journals* database-table. E.g:

```
GET /journals/[id].xml
```

- Alternatively, the journals object returned in the issues.xml could be enriched to contain the additional information from that table, such as the `created_on` date.

#### Associated revisions

##### Revision 4512 - 2010-12-14 20:03 - Jean-Philippe Lang

Adds journal `created_on` attribute to issue API (#7111).

#### History

##### #1 - 2010-12-14 19:56 - Jean-Philippe Lang

- *Category set to REST API*
- *Status changed from New to Closed*
- *Resolution set to Fixed*

The `created_on` was clearly missing and was added in [r4512](#). This seems to be the only attribute that was missing so I think we can close this ticket. Reopen if I am missing something.

##### #2 - 2010-12-14 19:56 - Jean-Philippe Lang

- *Target version set to 1.1.0*
