Thanks for that Matt.

I checked that the patch increases the limit OK.

However it seems that `validates_length_of` does not support multibyte chars, at least with my setup, and the problem of characters being cut remains. I'd like to look into this if I can find the time.

#2 - 2008-03-09 17:00 - Jean-Philippe Lang

- Status changed from New to Closed

Fixed in [r1220](#). The limit was set in the database to 255 to avoid multibyte chars problems.
