

Redmine - Feature #7157

Content Editor Preview at the same place where text is

2010-12-22 09:31 - Terence Mill

Category: Text formatting	Estimated time: 0.00 hour
Target version:	
Resolution: Fixed	
Description	
<p>When Preview edited text i always have to scroll around, especially if i have bigger wiki sites. This is no nice user experience. If you have a look at jira, they have realized the preview by showing it at the same place where the text is, kind of radio button on the right side of the editor. You can switch between preview and editing, but see the preview text on the same place where the text is edited, what makes less scrolling necessary.</p>

- Status changed from New to Closed

- Resolution set to Fixed

I think the new Edit/Preview tabs added in #27368 for the upcoming Redmine 4.0.0 cover all the requirements from this ticket. Please reopen if something is missing.
