Hi,

May this helps you: <https://github.com/edavis10/redmine/blob/master/lib/redmine/info.rb#L6>

Try to change

```
def help_url; 'http://www.redmine.org/guide' end
```

to some local URL, par example

```
def help_url; 'http://your_redmine_url/projects/help/wiki' end
```

You may want to create a project called 'help' and enable only the 'wiki' module for it.

Ivan

- Status changed from New to Closed
- Resolution set to Invalid

That would be the right place to change it.
