Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.0.4

Description

Performing an upgrade from 1.0.1 to 1.0.5, I've got the above mentioned issue. Reverting back does not solve the issue either. I've re-installed ruby as well. Webrick also has an issue!!!

C:/Ruby/lib/ruby/gems/1.8/gems/i18n-0.4.2/lib/i18n/backend/simple.rb:34:in `stor
e_translations': undefined method `deep_symbolize_keys' for "σ¡ÿσé¿σî╣ ΘàìΦºäσêÖσ
ÉÄµÅÉΣ ‖ ñ":String (NoMethodError)
from C:/Ruby/lib/ruby/gems/1.8/gems/i18n-0.4.2/lib/i18n/backend/base.rb:
193:in `load_file'

Gem list are as follows:

actionmailer (2.3.5)
actionpack (2.3.5)
activerecord (2.3.5)
activeresource (2.3.5)
activesupport (2.3.5)
cgi_multipart_eof_fix (2.5.0)
gem_plugin (0.2.3)
i18n (0.5.0, 0.4.2)
mongrel (1.1.5 x86-mingw32)
mongrel_service (0.4.0)
mysql (2.8.1 x86-mingw32)
rack (1.0.1)
rails (2.3.5)
rake (0.8.7)
shared-mime-info (0.1)
unicode (0.4.0.1 x86-mingw32)

ruby -v
ruby 1.8.7 (2010-08-16 patchlevel 302) [i386-mingw32]

Need help!!!

- Status changed from New to Resolved

- % Done changed from 0 to 100

Opps! Think I solve my issue. Found that the log files in \log folder is more effective in translating the unknown characters.

Googled for the unknown character and found this link:
https://github.com/rchady/redmine_importer/pull/3

Seems that it is a plugin issue with the config problem. Go to
\vendor\plugins\redmine_importer\config\locales\zh.yml

This file is missing the "zh:" header (without the double quotes)!
Added:
zh:

to resolve issue. It will be best if possible to include the problematic locale file in the logs as well! Maybe can categorize under i18n for future upgrading versions!

#3 - 2010-12-29 09:28 - Felix Schäfer

- Status changed from Resolved to Closed

- Resolution set to Invalid

That's a problem with the plugin, not redmine in itself, please contact the plugin's author so he can take care of it, thanks.

#4 - 2010-12-29 11:29 - Hansen Ler

Yup! The plugin owner has a new patch for that. Just added this for documentation. And in case some other plugin author make the mistake as well. Redmine 1.0.1 and 0.9.2 which I'm using the same plugin since has no problem after migration. Seems like newer version (where I upgrade from 1.0.1 to 1.0.5) does parse the locales with headers.

Anyways, cheers for the great job!
