Description It would be great if it was easy to customize the navigation menu items. For example, you could: <ul style="list-style-type: none">• Have a separate configuration page to allow any URL to be added.• Wiki markup to link to the specific wiki page (syntax would allow you to define the menu name, rather than just using the page title).

adding urls to the project navigation could be helpful, but is not soo important. Maybe you can change the priority to low.
