Resolution:			
Description Hi, I think there is a bug when we proceed a copy of a task. We have one project and one subproject. There is some people in the first, and there are anothers in the second. When we copy a task from the second to the first, so you can reassign to people which are not members of the first project. Or, if I'm correct, you souldn't be able to reassign to a person who is not member of the project. I hope that's clear. thanks,
