

Redmine - Feature #7246

Handle "named branch" for mercurial

2011-01-07 14:34 - Thomas Capricelli

Status:	Closed	Start date:	2011-01-07
Priority:	Normal	Due date:	
Assignee:	Toshi MARUYAMA	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	1.2.0		
Resolution:	Fixed		
Description			
<p>Mercurial has a concept of branches inside the same repository (as opposed to "use another repository as branch"). Currently, redmine only 'sees' the main branch and not the other ones.</p> <p>Handling the named branches would mean:</p> <ul style="list-style-type: none">- see commits from those branches in the repository tab (/projects/xx/repository/, /projects/xx/repository/revisions, individual file revision logs, ...)- use commits on those branches when matching for 'fixes' 'refs' and other actions

scm: mercurial: branches and tags are enable in model (#1981, #7246).

Revision 5130 - 2011-03-14 14:42 - Toshi MARUYAMA

scm: mercurial: add named branch test in functional test (#7246).

Revision 5218 - 2011-03-25 00:42 - Toshi MARUYAMA

scm: backout r5213. do not display both 'View all revisions' and 'View revision' links (#7984, #7246).

Git and Mercurial support **branch**.

Git in repository root shows **master branch**.

Git master branch does not have all revisions.

Mercurial default branch is **default branch**.

Mercurial shows **tip** in repository root.

Mercurial does not treat directory. "hg log DIR" costs high.

Getting correct limited changesets in sub directory and branch is very heavy.

So, if there is no recent revision in sub directory and branch,

no changeset shows.

History

#1 - 2011-03-15 06:14 - Toshi MARUYAMA

- % Done changed from 0 to 70

#2 - 2011-04-30 08:26 - Toshi MARUYAMA

- File hg-root.png added

- File hg-1.1-stable-rev.png added

- File hg-1.1-stable-url-path.png added

- Status changed from New to Closed
- Target version set to 1.2.0
- % Done changed from 70 to 0
- Resolution set to Fixed

We finished implementing the feature of Mercurial named branches browsing based on git branches implementation in #1406.

These are images of Redmine hgsubversion mirror.

- hg-1.1-stable-rev.png
- hg-1.1-stable-url-path.png
- hg-1.1-stable-file.png

There is a discussion about the top page of a repository.
Please see #7984.

| *use commits on those branches when matching for 'fixes' 'refs' and other actions*

I can not understand your request.
Please create new issue with descriptions in detail.
