| Description | | | |
| <p>Is there any plans for adding <i>custom fields</i>-functionality for <i>documents</i>? There are currently only on <i>Document Categories</i> and adding it to documents would be great as it would act as valuable metadata regarding versions, moderations etc.</p> <p>I see there are several issues about adding support for tags (#2897) for this and that, but none for documents. Just remove this if I'm mistaken.</p> <p>NB! The "SubmittingBugs"-link at the top-notice in "New issue" is defect.</p> | | | |
