Redmine - Defect #7255

cannot upgrade from 1.0.1 to 1.1.0 (or to 1.0.2, or to 1.0.5)

2011-01-09 22:18 - Edwin van Ouwerkerk Moria

Status:	Closed		**Start date:**	2011-01-09
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	1.1.0

Description

1.0.1 works fine, but upgrading the database for newer versions (first tried 1.1.0, then 1.0.5 and 1.0.2) gives a:

```
-bash-4.0# rake db:migrate RAILS_ENV=production
(in /opt/redmine-1.1.0)
rake aborted!
Object is not missing constant Issue!
```

I'm using postgresql 8.4.5 on Fedora 12. Ruby & postgresql installed through yum, redmine from tarball

-bash-4.0# ruby --version;
ruby 1.8.6 (2010-02-05 patchlevel 399) [i386-linux]

-bash-4.0# gem list --local

- LOCAL GEMS ***

daemons (1.0.10)
fastthread (1.0.7)
fcgi (0.8.8)
ffi (1.0.4)
i18n (0.4.2)
passenger (2.2.15)
postgres (0.7.9.2008.01.28)
postgres-pr (0.6.3)
rack (1.0.1)
rake (0.8.7)

Any hints appreciated...

History

#1 - 2011-04-16 16:33 - Etienne Massip

May be somehow related to [RE: "Object is not missing constant Issue!" on CentOS 5.5](#), except it is MySQL instead of pg.

#2 - 2022-01-19 07:50 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Cant reproduce

I am closing this issue because Redmine 1.1.0 is very old.

Please reopen this issue if you experience the same issue when upgrading to the latest version of Redmine.
