

Redmine - Defect #7256

redmine/public/.htaccess must be moved for non-fastcgi installs/upgrades

2011-01-10 07:45 - Eli Stevens

Status:	Closed	Start date:	2011-01-10
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	1.1.1	Affected version:	
Resolution:	Fixed		
Description <p>The file redmine/public/.htaccess must be moved aside for non-fastcgi(? see: http://www.redmine.org/boards/1/topics/3417) installs, but the file is installed by default, and not mentioned in either http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade or http://www.redmine.org/projects/redmine/wiki/RedmineInstall .</p> <p>Either the file needs to be named something like .htaccess_for_fastcgi or the docs need to be updated. Marking as priority high, because this will break people's setups as they upgrade to 1.1.0.</p> <p>I don't have edit rights on the wiki, otherwise I'd have added a note to the docs myself.</p>
