I wrote that documentation -- with the intention that it would be used for Redmine!

The Redmight site seems to be down; I've contacted the person who accepted the help on behalf of Redmine, and asked him to make it available again.

Cheers,
jh

It's back up: http://docs.redmight.com/projects/docs/wiki

I should mention that this uses some CSS, which I think is disabled in Redmine by default.
