

Redmine - Defect #7305

undefined method `visible_custom_field_values' in users/show.rhtml

2011-01-12 08:03 - Artem La

Status: Closed	Start date: 2011-01-12
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version: 1.1.0
Resolution: Cant reproduce	

Description

After updating redmine to 1.1.0.
Trying to view <http://localhost/users/8> gives:

```
Processing UsersController#show (for 127.0.0.1 at 2011-01-12 01:02:11) [GET]
Parameters: {"action"=>"show", "id"=>"11", "controller"=>"users"}
Rendering template within layouts/base
Rendering users/show

ActionView::TemplateError (undefined method `visible_custom_field_values' for #<User:0xb692d914>)
on line #12 of app/views/users/show.rhtml:
9: <% unless @user.pref.hide_mail >
10: <li><=l(:field_mail)%>: <%= mail_to(h(@user.mail), nil, :encode => 'javascript') ></li>
11: < end >
12: < @user.visible_custom_field_values.each do |custom_value| >
13: < if !custom_value.value.blank? >
14: <li><=h custom_value.custom_field.name%>: <%=h show_value(custom_value) ></li>
15: < end %>

app/views/users/show.rhtml:12:in `_run_rhtml_app47views47users47show46rhtml'
  app/controllers/users_controller.rb:79:in `show'
  app/controllers/users_controller.rb:78:in `show'
  /var/www/redmine/public/dispatch.fcgi:24

Rendering /var/www/redmine-1.1.0/public/500.html (500 Internal Server Error)

Rails 2.3.5
Ruby 1.8.7 (2008-08-11 patchlevel 72) [i486-linux]
MySQL 5.0.67-0ubuntu6.1

Tried patch from #7297, but no luck

This is not a duplicate; this one is about the "user" bug, not the "project" bug.

The patch won't help; this one is caused by incorrect installation instructions. The fix is to download a fresh redmine, and copy everything out of its vendor/plugins/ directory into your vendor/plugins/ directory, *overwriting directories of the same name* (emphasis added in case you're on windows, which merges by default).
