Redmine - Feature #7322

add ability to filter the activity page

Description
using 1.0.4

I would like to be able to filter the activity page by the assigned to person. Currently I can only restrict the activity by type, and there is no filtering.

What I would like to see is the recent activity restricted by a particular developer.
e.g. time spent by developer X.

I can see how this could be extended to support other filtering like the Issue page, or by date range, but my current workflow just requires activity by person.

Thanks

I think its a usefull feature to filter activities by user, +1 for this

#2 - 2011-01-14 18:18 - Jean-Philippe Lang

The filter is already implemented. Go the user's profile and then you can click 'activity' to navigate in the user's activity.
http://www.redmine.org/activity?from=2011-01-14&user_id=1

Aha, so it is. Thanks Jean-Phillippe.

Then my request would be to have this existing functionality in one place, and at a more visible level.
i.e. add the filter ability to the project's main activity page.

In the mean time I will use this.

#4 - 2015-04-22 09:40 - Tomislav Nakic-Alfirevic

From my experience, it would be useful to have a similar filter available for activity as for issues, i.e. selecting a set of users to see (or not see) and a date range at the very least, but possibly tracker, status, priority and possibly other fields.

- Category set to Activity view

#6 - 2016-06-20 13:33 - Martin von Wittich

+1 for the ability to filter the activity view by multiple users at once; that is currently not possible with the &user_id parameter. We would use that for quality control monitor the contributions of our less experienced developers.
