Redmine - Feature #7349

Per-project email notification settings

2011-01-17 14:48 - Max Khon

Status:	New	**Start date:**	2011-01-17
Priority:	Normal	**Due date:**

Target version:			
Resolution:			

Description

It should be possible to configure email notification settings per project (with global notification settings be the default for new projects).

So that it is possible to use the same redmine installation for e.g. development and support tasks (with different e-mail notification settings for dev. and support projects).

History

#1 - 2011-02-08 11:36 - Denis Malinovsky

- File project_notifications.diff added

Here's somewhat dirty patch for this issue.

- It creates new ProjectSetting model,
- migrates global notification settings for each project,
- adds project notification settings page with following options: Emission email address, Blind carbon copy recipients (bcc), Plain text mail (no HTML), Emails header and Emails footer.

#2 - 2011-02-09 05:48 - Denis Malinovsky

- File project_notifications.diff added

Fixed a bug with settings migration—didn't take into account global settings may not be exist in database yet, now it's loading configuration defaults as well.

#3 - 2011-02-09 07:08 - Denis Malinovsky

- File project_notifications-3.diff added

One more bug fix—made project notification settings table structure identical with global settings.

#4 - 2011-07-04 09:31 - Kyeongmo Cho

This is not work with System Notifications plug-in.

#5 - 2013-01-17 10:45 - Adrian Rotaru

+1

#6 - 2013-01-27 16:17 - Julian S. Luipold

+1

#7 - 2013-02-04 11:03 - Premysl Vohnout

This would very interesting feature. +1

#8 - 2013-03-18 16:51 - Eric Brüggemann

Anyone tried this patch with Redmine 2.2.3?

#9 - 2013-10-23 15:57 - Jonas Götze

+1 Very useful. My Reporters are quite confused because they need to send the email to create tickets to another adress than the one notifications are coming from.

edit: I think this plugin might support it - I will try:
https://github.com/jfqd/redmine_helpdesk

#10 - 2013-11-14 05:24 - Vikram Lele

+1 very useful feature.

I have different roles in different projects, and may not want same level of notifications in all the projects.

this code into app/models/mailer.rb

```
def mail(headers={}, &block)
    headers.merge! 'X-Mailer' => 'Redmine',
           'X-Redmine-Host' => Setting.host_name,
           'X-Redmine-Site' => Setting.app_title,
           'X-Auto-Response-Suppress' => 'OOF',
           'Auto-Submitted' => 'auto-generated',
           'From' => Setting.mail_from,
           'List-Id' => "<#{Setting.mail_from.to_s.gsub('@', '.')}>"
    if @issue
      headers.merge!('From' => "[#{@issue.project.name}] - #{Setting.mail_from}")
    end
```

seems to do the tricks

#15 - 2015-03-02 15:36 - [Desperados]

is this trick working with 2.6.x ? thanks

#16 - 2015-03-08 01:21 - Toshi MARUYAMA

- Has duplicate Feature #6080: Email Nofitication Setting for Project added

#17 - 2015-03-08 01:24 - Toshi MARUYAMA

- Has duplicate Feature #19047: Email notification per project added

#18 - 2015-03-27 12:04 - dominik ch

For all people looking for specific e-mail address per project, code above just adds project name to "From" field. To change email address we need to add custom field for project and add it there. Following works:

```
  def mail(headers={}, &block)
    headers.merge! 'X-Mailer' => 'Redmine',
```

```
            'X-Redmine-Host' => "#{Setting.host_name}",
            'X-Redmine-Site' => Setting.app_title,
            'X-Auto-Response-Suppress' => 'OOF',
            'Auto-Submitted' => 'auto-generated',
            'From' => Setting.mail_from,
            'List-Id' => "<#{Setting.mail_from.to_s.gsub('@', '.')}>"

    if @issue
      new_name = "#{@issue.project.name} [#{Setting.app_title}]"
      headers.merge!('From' => "#{new_name} <#{Setting.mail_from}>")
      new_mail = @issue.project.custom_field_values[0].value
      if !new_mail.nil?
        if new_mail.length() > 5
          headers.merge!('From' => "#{new_name} <#{new_mail}>")
        end
      end
    end
```

To avoid wrong email addresses I used regexp for field:

```
^[a-zA-Z0-9_.+-]+@mydomain.com
```

That way I forced to use something from our domain too :)

It checks if there is value of first custom field for project (in my case it was first) and then alters From address. It works for latest 2.6.x redmine, and it's quite simple. All You have to do is to configure that additional project field and fill it with different email if needed. I think there is more e-mail comming out of project (like news or something) but this one covers almost all of my needs.

#19 - 2015-04-09 17:48 - [Desperados]

does it work with redmine 3? thanks

#20 - 2015-09-24 17:52 - Mutsu Yakumo

Hello, I hope someone can help me.

I have different Projects where created Tickets.
And I need for every Project another emission Address, for Updating the Tickets.
I tried so much things, but nothing work…

I'm using Bitnami Redmine Version 3.1.0-0

I hope someone have a reason for my Problem.

#21 - 2015-11-20 15:38 - Daniel Feliciano Branco

+1

#22 - 2016-09-08 08:38 - Toshi MARUYAMA

- Related to Feature #23565: As a project admin I need to be able to set notification rules at the project level based on a role. added

#23 - 2017-05-17 21:52 - Aleksandar Pavic

On which version of Redmine does patch work with?

And +1 for this feature

#24 - 2017-07-22 18:38 - Ilya Prokazov

+

need ability to specify different mail-from address for different projects
Is this plugin actual? https://github.com/ajwalters/redmine_project_specific_email_sender
