Redmine - Defect #7375
<pre>...</pre> doesn't escape wiki syntax correctly
2011-01-19 17:43 - Michele d'Amico

Status: Closed
Priority: Normal

Description

Try this wiki code (see http://demo.redmine.org/projects/testcode/wiki/Wiki):

does really escape? <code class="ruby">
# The Greeter class
class Greeter
  def initialize(name)
    @name = name.capitalize
  end

  def salute
    puts "Hello #{@name}!
  end
de\n</code>

I think that the pre tag blocks should escape the wiki syntax at all without "see" any wiki code like tags

- Status changed from New to Closed
- Resolution set to Invalid

The "does really escape?" string is not inside a pre tag.
Past your example in a simple html page and see how firefox renders it.

I'm sorry, maybe the body of my bug is affected to that bug to:

I've attached the wiki text that I wrote in the body and I think it should become like this where pode is replaced by code:

<pode java>
does really escape?

```ruby
# The Greeter class
class Greeter
  def initialize(name)
    @name = name.capitalize
  end

  def salute
    puts "Hello #{@name}!"
  end
end
```

I know that pre tag block is a wiki to html escape, but I think a wiki to simple text escape could be useful too (something like {{nowiki}}, {{nowiki_end}} macros).

I found that issue while writing a dokuwiki to redmine's wiki translator and maybe that is a very rare case; if you think that is not a bug or it is how redmine's wiki should work close it and please forgive me for the noise.

Just a question: how can I write <pode> where pode is replaced by code with redmine's wiki engine?

Regards

--Michele

- Category set to Text formatting

#4 - 2011-08-04 17:27 - David Raison

Any developments on this?
In my case I'm trying to display xml containing a <kode> (:s/k/c/) tag inside a  
<pre></pre> blog.

#5 - 2011-08-04 17:28 - David Raison

I found that by doubling the tags, i.e. using <code>728</code> I can show at least one pair.

#6 - 2011-11-28 11:50 - Etienne Massip
- Status changed from Reopened to Closed
- Resolution changed from Invalid to Duplicate

Dupe of #4472.
