

Redmine - Defect #7378

Adding a new file doesn't inherit parent version

2011-01-19 23:38 - Peter B

Status:	Closed	Start date:	2011-01-19
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	1.1.0
Resolution:	Wont fix		
Description			
When adding a new file in the files tab in a child project, the version drop down box doesn't list the inherited parent versions.			

History

#1 - 2011-01-22 14:36 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix

If you want to add a file to another project version, you'll have to add it from this project.

#2 - 2011-01-24 07:48 - Peter B

But the child's project version is the same as the parent version because its inherited from the parent. Those inherited versions I thought would be applicable across everything done in the child project.
