Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		

Description

I have added many projects in my redmine, but all repositories connected to a svn google code repository takes up to 10 sec. to show the treeview.

I'm not able to find out, why.
Any hints ?

But it doesn't work for me. I have applied the patch in my version 1.1.0
But it takes up to 10 seconds. No change.

Here is the page : <http://www.contao-forge.org/projects/catalog/repository>
And here is the GC SVN : <http://typolight-catalog.googlecode.com/svn/>

I think I have to look closer to the code itself.
