

Redmine - Patch #7446

Patch for bulk-edit of parent-id

2011-01-25 19:59 - Brian Lindahl

Status: Closed	Start date: 2011-01-25
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version:	
Description We often use the a parent task to track the progress towards each release. When doing release planning, it's useful to not only update the 'Target Version' (and possibly due date) via bulk edit, but it's also useful to update the parent id via bulk edit. This patch adds the ability to edit the parent-id when bulk editing.

History

#1 - 2011-01-26 22:15 - Brian Lindahl

- File *bulk-edit-parent-1.1.0.patch* added

patch migrated to Redmine 1.1.0

#2 - 2011-03-29 10:58 - Hans Bangkok

+1 very nice when "refactoring" issues into a hierarchy

#3 - 2011-03-29 11:15 - Etienne Massip

This feature has been included to [1.2.0](#) release, but maybe not with the same implementation as the patch (there was no relationship with [#5831](#) and so the patch came under the radar (is that English ?)).

#4 - 2011-04-01 22:50 - Brian Lindahl

- Status changed from *New* to *Resolved*

- % Done changed from 0 to 100

Resolved by [#5831](#) in Revision 5224. Target version is 1.2.0.

#5 - 2011-04-02 02:52 - Toshi MARUYAMA

- Status changed from *Resolved* to *Closed*
