Target version:			
Resolution:	Duplicate		
Description It might be usefull to assign a ticket to a group (support for example) insted of assigning to a singel person. Hint: A Consultant is sending a ticket by Mail, redmine is using imap to fetch. Using CC in the Mail will also reach the Developers by mail AND by Redmine Using a group and inform the members will be better, cause the developer only gets one information.			
Related issues: Is duplicate of Redmine - Feature #2964: Ability to assign issues to groups Closed 2009-03-13
