It looks like it works here. Does this problem occur with that particular file only ?

#3 - 2008-03-01 10:50 - Brad Miller

I'm having this issue too. It appears to be an issue with Safari. I get error page every time and have had reports from my users of it happening. If I try to upload the same file with Firefox (2.0.0.12) it works correctly. So it looks like something is broken with Safari and file uploads.

I was running r1137 and upgraded to r1183 tonight. The problem happens on both.

#4 - 2008-03-12 15:42 - Ben Oakes

I've had a similar issue, but it seems to only happen sporadically. (I.e., I just tested it now, but it worked. But i've often had to just fire up Firefox after losing the note I've written, etc, just to re-do everything.)

#6 - 2008-03-23 11:18 - Brad Miller

For the Safari aspect of this bug that I reported on in comment 3, it appears to be fixed with Safari 3.1 for the mac. I can successfully upload files with it on the same version of Redmine as before. It looks like the Safari team fixed what ever issue Safari had with uploads.

#7 - 2008-04-29 11:57 - Edward Chang

The same to me.
When I change internet explorer's encode to Big5(Default is UTF8), It can be upload(Our country's computer is default using Big5).
I guess it's a problem when file save to disk is using encode UTF8. Not our country's encode.

#8 - 2008-05-05 16:07 - Edward Chang

- Target version set to 0.7.1

About Invalid argument - ./files/080228121105_⧄.ppt

May I ask, When file save to "files" directory, Don't use orange file name to save to directory and let we try to upload? I guess it's a program about charset.
(ex: file name "./files/080228121105_⧄.ppt", Change to "./files/080228121105_(time, minute, millisecond or else).ppt" to save it.)

Because it's really a big program to use it when we can't upload files.
Thanks.

#9 - 2008-05-06 23:55 - Jean-Philippe Lang

- Target version deleted (0.7.1)

- Affected version (unused) set to 0.7.0

#10 - 2008-05-17 13:02 - Jean-Philippe Lang

- Status changed from New to Closed

Fixed in r1433. Filename will be hashed if needed.
