Your files target is old.  
Please update files to latest SVN trunk.

##### #4 - 2013-02-10 15:46 - Filou Centrinov

Please close this issue and mark it as invalid because:

brasil.yml (=pt-BR.yml)

- many missing translations
- seems to contain wrong translations: ex. "field\_project: Projeto" (actual) vs. "field\_project: Empresa" (proposal)
- wrong translation: ex. it should be "%{count}" instead of "{{count}}"

calendar-brasil.js

- where is this file located in redmine?? may this is deprecated?

jstoolbar-brasil.js (=jstoolbar-pt-BR.yml)

- no difference to actual version

##### #5 - 2013-02-10 17:36 - Jean-Philippe Lang

- Status changed from New to Closed

Closing as obsolete.

where is this file located in redmine?? may this is deprecated?

Redmine now uses JQuery DatePicker. Translation files can be found in public/javascripts/i18n.
