History

#1 - 2011-12-16 13:00 - Miłosz Kosobucki

Patch is available for 11 months. Is it possible that it will be merged soon?

#2 - 2011-12-16 13:22 - Toshi MARUYAMA

- Status changed from New to Closed

I think Redmine core should not have this feature.
It is impossible to test.
Plugins should provide this feature.

#3 - 2011-12-16 15:32 - Miłosz Kosobucki

- Status changed from Closed to Reopened

So why SVN has these features in core and mercurial and git can't?

#4 - 2011-12-16 23:29 - Toshi MARUYAMA

- Status changed from Reopened to Closed

SVN does not have this feature. Redmine reads SVN repository directory.
As discussing at #9813, remote SVN is very slow.
Redmine needs to run cat/diff/annotate.
So, Git/Mercurial repository need to be in same machine.
Mercurial repository is easy to sync(pull/push).
You can use hook or etc.
