

Redmine - Defect #7496

"Custom queries" should use natural ordering

2011-01-31 09:58 - Anonymous

Status:	New	Start date:	2011-01-31
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description The custom queries are currently sorted, but instead it would be better to use natural sorting so that numbers get ordered correctly, what I mean by this is that currently this is how Redmine displays custom queries: <ul style="list-style-type: none">• 1. Foo• 10. Bar• 2. Car When using natural ordering, it should appear as: <ul style="list-style-type: none">• 1. Foo• 2. Car• 10. Bar			

History

#1 - 2017-03-20 03:22 - Go MAEDA

- Category set to UI

#2 - 2018-06-14 07:02 - Hans Kaiser

I would rather prefer to have a configurable sorting for each query
also it would be great to be able to add separators in the list of queries to be able to optically group them

#3 - 2019-02-27 13:25 - Rembert Oldenboom

The natural order doesn't appeal to me, I like as it is. With my custom queries I just start at 10 but one could opt to start at 01 or even 00.

I'd like to see this issue solved another way, by having a sequence-field with all custom queries. The custom queries will then be listed in order of this sequence field. For those custom queries having the same sequence field, then the current ordering is used (same for queries not having a sequence field provided).

#4 - 2019-07-18 17:02 - Heiko Böhme
