

Redmine - Defect #7505

Subversion: Repository URL with space not handled correctly

2011-01-31 22:39 - Adam Piotr Żochowski

Status:	Closed	Start date:	2011-01-31
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
<p>To avoid issues with any special characters in URL I use Tortoise svn and it's " copy url link " option while browsing repository. So Redmine gets nice clean proper URLs:</p> <p>https://server/projects/Project%20Name</p> <p>However, new Redmine now is munging clean URLs. For example the above URL gets parsed as:</p> <p>https://server/projects/Project%2520Name</p> <p>as far as I can guess, the URL is meant to be escaped, however lib\redmine\scm\adapters\subversion_adapter.rb is doing too much of replacing :</p> <pre>def target(path = '') base = path.match(/^\/\//) ? root_url : url uri = "#{base}/#{path}" uri = URI.escape(URI.escape(uri), '[]') shell_quote(uri.gsub(/[\?<>*]/, '')) end</pre> <p>This code is escaping too much. If URL is properly entered (and it should be) then no need to escape it again.</p> <p>This is a regression from 0.9 series that worked ok with URLs.</p>
