

Redmine - Defect #7556

ActionView::TemplateError (undefined method `anonymous_user_path'...) on klicking administration/users

2011-02-05 18:46 - Tomas Hildebrandt

Status:	Closed	Start date:	2011-02-05
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Administration	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
The following Problem arises when klicking on administration/users:			
<pre>ActionView::TemplateError (undefined method `anonymous_user_path' for #<ActionView::Base:0x424b3ee8>) on line #42 of app /views/users/index.rhtml: 39: <td class="last_login_on" align="center"><%= format_time(user.last_login_on) unless user.l ast_login_on.nil? %></ td> 40: <td class="buttons"> 41: <%= change_status_link(user) %> 42: <%= link_to(l(:button_delete), user, :confirm => l(:text_are_you_sure), :method => :delete, :class => 'i con icon-del') unless User.current == user %> 43: </td> 44: </tr> 45: <% end -%></pre>			
<pre>app/views/users/index.rhtml:42:in `_run_rhtml_app47views47users47index46rhtml' app/views/users/index.rhtml:31:in `each' app/views/users/index.rhtml:31:in `_run_rhtml_app47views47users47index46rhtml' app/controllers/users_controller.rb:59:in `index' app/controllers/users_controller.rb:58:in `index' /var/www/redmine/public/dispatch.fcgi:24</pre>			
Rendering /var/www/redmine-svn/redmine/public/500.html (500 Internal Server Error)			
But im able to mchange the url to http://.../users/x and see the user details and can change settings whitout problems for all ids >=6			
Im Using apache/fcgid/mysql on version Redmine 1.1.1.devel.4798 (MySQL).			
svn status shows only minimal changes, where 'update_redmine' is a script to backup und 'svn up' to the latest version.			
<pre>root@home:/var/www/redmine# svn status ? update_redmine M config/environment.rb ! public/dispatch.fcgi.example ? public/themes/holo</pre>			
I Think it is a problem with the database and migration. Im using the devel version without problems since 2006.			
Everything else is fine... where is the problem???

History

#1 - 2011-02-05 18:52 - Tomas Hildebrandt

Additional info about the environment...

*** LOCAL GEMS ***

```
actionmailer (2.3.5)
actionpack (2.3.5)
activerecord (2.3.5)
activeresource (2.3.5)
activesupport (2.3.5)
i18n (0.4.2)
postgres-pr (0.6.3)
rack (1.0.1)
rails (2.3.5)
rake (0.8.7)
```

#2 - 2011-02-05 19:13 - Tomas Hildebrandt

Correction: Im using redmine since **2008**

Additional Information about installed plugins in the past:

```
redmine_blogs
google_analytics
redmine_mylyn_connector
```

#3 - 2011-02-07 15:04 - Etienne Massip

Got exactly the same error if I set the status field for AnonymousUser in table users to 1.

It should be 0, set it to 0.

#4 - 2011-06-24 11:01 - Karel Pičman

Yes, this helps:

```
mysql> update users set status = 0 where type = 'AnonymousUser';
```

#5 - 2011-06-24 11:12 - Karel Pičman

status != 0 by the anonymous user was caused by my own plug-in that locks all users not logged in for more than 3 months.

#6 - 2011-06-24 11:54 - Etienne Massip

- *Status changed from New to Closed*
- *Resolution set to Invalid*

Guess that the issue is gone for Tomas too.
