I guess it is useful to make it possible that one can define keywords like "fixes" but distinguish between the trackers in which state the issue of the tracker should be set.

If #123 belongs to tracker "Feature" then "fixes #123" means feature goes to "Ready for test"

If #123 belongs to tracker "Build" then "fixes #123" means feature goes to "Done"

Assuming that Support doesn't have the state "Ready for test" but has the state "Done"

Additionally, the issue #1232 has other good ideas which should be done in one thing with my "tracker wise" idea.

regards

Matthias

## Associated revisions

**Revision 12208 - 2013-10-13 09:37 - Jean-Philippe Lang**

Ability to define commit keywords per tracker (#7590).

**Revision 12209 - 2013-10-13 09:39 - Jean-Philippe Lang**

Migrate settings according to r12208 (#7590).

**Revision 12216 - 2013-10-13 12:03 - Jean-Philippe Lang**

Fixed that non array commit_update_keywords raises an error (#7590).

## History

**#1 - 2013-10-05 11:58 - Jean-Philippe Lang**

- Duplicated by Feature #12656: make commit keywords and issue ratio configurable for each tracker added

**#2 - 2013-10-13 09:36 - Jean-Philippe Lang**

- Related to Feature #4911: Multiple issue update rules with different keywords in commit messages added
Feature added in r12208.

#4 - 2013-10-13 11:17 - Ivan Cenov

Tested source:/trunk@12215 without any plugins. Configuration: thin, Ruby 1.9.3, Windows 7. Executed ` rake db:migrate RAILS_ENV=production` (I saw no migration output in console though). Here is what received at /path/to/redmine/settings:

```

This should be fixed in r12216.

Yes, it works in source:/trunk@12218.

Thanks for your feedback Ivan.
