### Description

App/models/mail_handler is useful but not extensibly from plugins. I think it would be useful if MailHandler were extensible by making a subclass based on it.

I wrote the attached patch. This introduces MailHandler#dispatch_to_default which just calls receive_issue by default. Plugin can extend the dispatch table by overriding #dispatch_to_default.

### Associated revisions

**Revision 4820 - 2011-02-12 11:08 - Jean-Baptiste Barth**

Introduced MailHandler#dispatch_to_default method to make MailHandler more extensible. #7598

### History

**#1 - 2011-02-12 11:08 - Jean-Baptiste Barth**

- Status changed from New to Resolved  
- Assignee set to Jean-Baptiste Barth  
- Target version set to 1.1.2

If it makes plugin development easier, let's go. Don't hesitate to tell us if you have ideas about a real API (don't know if it's really needed though).

Applied in r4820, thanks.

**#2 - 2011-03-06 13:55 - Jean-Philippe Lang**

- Status changed from Resolved to Closed

Merged in 1.1-stable.
