Description

When you create an issue with multiple subtask in it (I'm talking about a list of things to do in a ticket. Not link to other tickets).

It would be great to be able to put checkbox in front of each subtask in it. you could then check the checkbox when the subtask is complete as the issue evolves.

Like this :

[ ] or this [] for unchecked checkbox
and
[*] or this [x] for a checked checkbox

    checkbox.jpg Task number one to do
    checkbox_s.gif Task number two complete
    checkbox.jpg task number three to do
    checkbox_s.gif task number four complete
    checkbox_s.gif task number five complete

Probably you can implement it using macros and attached images. (For example {{checkbox(true)}} and {{checkbox{false}}).)

I need this solution as well, someone knows something
