Redmine - Defect #7606

Gantt view displays sub-project tasks in the parent project's milestone

2011-02-11 11:21 - Dennis H

Status:	Closed	**Start date:**	2011-02-11
Priority:	Normal	**Due date:**

Category:	Gantt	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate	**Affected version:**	1.1.1

Description

This problem occurs under the following conditions:

- There is a version/milestone in the main project with "Sharing" property set to "with sub-projects".
- Issue A is assigned to the sub-project
- Issue A is set to the parent project's version milestone.

In the Gantt view, the milestones are drawn under their respective project - in this case, the main project. Under the milestone icon, all the related issues are rendered, although the Issue A belongs to a sub-project.

The sub-project tree is drawn under the parent's milestone and is empty.

Is this the intended behavior? Visually, this is a little confusing.
