Target version:			
Resolution:			
Description When adding issues to versions I expected the due date of the issue to match the due date of the version. Here are some behaviors I thought would be nice: <ul style="list-style-type: none">• If an issue without a due date is added to a version with a due date it gets that due date• If a due date is changed on a version prompt to 'standardize' this due date for the rest of the issues• If an issue due date is changed to after the version due date a warning is thrown(?) I was expecting similar interactions with due dates as related tickets have with percent done.
