```

Futhermore it gives a http 500 error if I try to show a ticket.

What is the problem?

The rake errors still exists, but the http 500 is fixed by update the workflow table manually (See 20110220160626_add_workflows_assignee_and_author.rb in [#4895](#)). I think the db update dont finished successfully because the rake errors above.

lib/tasks/migrate_from_trac_vgsg.rake is failing and is not vanilla Redmine.
