<b>Resolution:</b>			

#### Description

Currently we have nice feature to associate with revisions in issue, it will be nice as well to associate with CI builds.

- Add additional block (like revision) for CI builds
- Open REST API for it.

After that, we can update redmine-plugin in jenkins (a.k.a hudson) to implement this.

see "JIRA plugin example:<http://wiki.jenkins-ci.org/display/JENKINS/JIRA%2BPlugin>"

Currently I can only append it in Description, and good to have it separately.
