Description eb-gb language file has label_user_mail_option_none: "Only for things I watch or I'm involved in" and label_user_mail_option_only_my_events: Only for things I watch or I'm involved in First should be none. Are these files partly auto generated? im confused as to why it has a mix of quoted and unquoted strings as well as for example the label_user_mail_option strings being in two separate places in the file. seems messy. patch attached.			

History
