<https://github.com/behrang/redmine-themes>

<http://www.redmine.org/issues/7418>

**#8 - 2021-04-05 07:03 - Abbas Samgani**

Hi dears

I have been following the solar calendar for Redmine for a long time, but I didn't find any results,

People who have done this before are from older versions of Redmine.

Is it possible to create a plugin in this regard?

**#9 - 2021-12-19 12:07 - Amir Khalili**

Gentlemen hope you enjoy the show.

I needed it so i made it.

I'm not a developer by nature btw.

Redmine version 4.1.1 fully Persian localized for F\* Free. Things that localized:

- The actual Calendar.
- Every date input has Jalali date picker (thnx to Reza Babakhani <[babakhani.reza@gmail.com](mailto:babakhani.reza@gmail.com)> for free JS date picker).
- Roadmap has Jalali dates.
- Versions has Jalali dates.
- Activies are displayed in Jalali dates.
- Wikis are in Jalali dates.
- Every dates that are used in Issues are now in Jalili format (things like: "created\_on", "updated\_on", ...)
- Repositories are fully in Jalali format.
- Gantt is in jalali format (i dont like it though).
- Documents dates are in Jalali format.
- Files dates are in Jalali format.
- Time entries are in Jalali format. You can add time entry in Jalali format, you can also report everything in Jalali dates.
- Dates tooltips are in Jalali format.
- Many icons, tables and context menus tweaked to fully support RTL schema.

Plugins that localized:

- Agile board plugin fully persian localized (God dammit he even did that too! LoL LoL LoL). even it's chart dates now diplay Jalali dates.
- "More previews" plugin localized (it's just dates table you know :D )
- CK Editor ADDED :)) .

Things not included (I haven't really looked into these yet, cause i had no interest)

- News
- Forums

Notes:

- When you use date filters to filter something the most stable way is to use "From To" model which gives you two date inputs. I tweaked "Current date" and "Current month" to display right dates but "previous week", "previous months" and stuff like that may don't give you expected results :D !
- Dont mess around with "Date format" in settings, Its hard coded in some places :)) Use default one.

May i proudly present you:

<https://github.com/dearssickness/redmine-fa>

Ow it has a fully several times tested Persian installation document which added to the main code "Redmine-Deployent.docx". Just connect machine to Internet and copy paste stuffs LoL.

Thnx to Redmine guys.
