Category:	Email notifications	Estimated time:	0.00 hour
Target version:	1.1.2	Affected version:	1.1.1
Resolution:	Fixed		
Description			
<p>I tried to change my email notification settings on My account page. I set 'No events'. I expected I didn't receive any updates about issues. But email notifications are received if someone add me as watcher. I didn't found any explanations about this behavior of Redmine.</p> <p>So I suppose this is a possible bug.</p>

Redmine is updated by our administrators using this page:
<http://www.redmine.org/projects/redmine/wiki/RedmineInstall>
I will ask them about migration.

- Subject changed from email notification are sent if even 'No events' setting is chosen to Email notification are sent to wathchers even if 'No events' setting is chosen

- Target version set to Candidate for next minor release

It's a bug as ActAsWatchable#watcher_recipients (source:trunk/vendor/plugins/acts_as_watchable/lib/acts_as_watchable.rb#L39) does not take account of user's notification preferences.
