

## Redmine - Defect #7782

### category link/query not handling multiple projects for version targets spanning more than one project

2011-03-04 22:52 - Gerry Hawkins

<b>Status:</b>	New	<b>Start date:</b>	2011-03-04
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	Projects	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	1.0.4
<b>Resolution:</b>			
<b>Description</b>			
<p>The category list of issues on the version page has problems with issues that are in different projects.</p> <p>e.g. a target version is either shared within a project hierarchy or for all projects. issue 1 is in project A with category NN issue 2 is in project B with category XX</p> <p>In the version page for the target version I see the category list having 1 issue in each category. But the link / query is wrong as I can not jump to the other project. The query only works for issues that are in the project I am in when I am on the version page.</p> <p>[Using 1.0.4]</p>			

#### History

#1 - 2011-03-05 12:41 - Etienne Massip

- Affected version (unused) set to 1.0.4

- Affected version set to 1.0.4
