

Redmine - Patch #7795

Internal server error at journals#index with custom fields

2011-03-06 14:45 - Yuki Sonoda

Status:	Closed	Start date:	2011-03-06
Priority:	Normal	Due date:

Target version:	1.1.2		
Description /issues/changes fails with internal server error when a issue has a custom field. Here is the stack trace. http://pastie.org/1639290 This is because JournalsController does not declare using custom_fields helper. The attached patch fixes this problem.			

Associated revisions

Revision 5021 - 2011-03-06 17:04 - Jean-Philippe Lang

Fixed: error on JournalsController#index when custom fields are present (#7795).

History

#1 - 2011-03-06 17:13 - Jean-Philippe Lang
