

Redmine - Feature #782

Sites using redmine

2008-03-04 13:32 - Charles L

Target version:			
Resolution:			
Description			
Not a real issue - more of a doc patch style thing (I'm unable to just edit the wiki...).			
Thought I'd start a list of sites using redmine. People often look for this, and I think it was planned anyway. An example (from http://changelog.complete.org/posts/694-Trac-Git.html)			
One thing that makes me nervous, though, is that they have no links to sites that use Redmine (except one in the news section),			
So, from a bit of googling:			
<ul style="list-style-type: none">• TYPO3 Forge - http://forge.typo3.org• IntelliSoft Systems - http://intellisoftsystems.com• Makerlab - http://makerlab.com• phpBB Code Forge - http://code.phpbb.com• TEAM 3 Logistics - http://www.t3log.info• rVooz - http://redmine.rvooz.org/projects• Applied Solutions - http://www.appsol.net• SharpOS - http://sharpos.org/redmine			
A google search for +"Home projects help" +"sign in register" will turn up many more - ~230 when I ran this.			

History

#1 - 2008-03-04 13:47 - Charles L

A couple more, searching for "powered by redmine"

- Quake-World Dev - <http://www.qw-dev.net/>
- Ensemble OS - <http://ensemble-os.org/>
- Siemens uses redmine :) - <http://www.co2quickstart.co.uk/redmine/login>
- Nebular Gauntlet - <http://www.silentlink.com/>

#2 - 2008-03-04 18:31 - Thomas Lecavelier

- Status changed from New to Closed

- Assignee set to Thomas Lecavelier

- % Done changed from 0 to 100

Thank you ;)
