Redmine - Feature #7823

Custom field sub project

2011-03-10 12:16 - Luis Serrano Aranda

Status:	New	**Start date:**	2011-03-10
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Custom fields	**Estimated time:**	0.00 hour
Target version:			
Resolution:			

Description

A new custom field subproject, and the possibility of configure in what project (and in consequence your subprojects) this custom field exist.

I think is a interesting feature

Adding a comment to this as I was just given a request that this feature would have done exactly what they want. We have an office with multiple projects and they'd like to have a single place to put help desk calls. If we were to group all those projects as subs under one main project, the main project could contain the calls but would need a custom field that could list the appropriate sub-projects instead of a plain text or manually edited list.
