Description

I can't paste text from the clipboard (CMD+V) into a wiki-page, it simply doesn't do anything. I use Chrome on Mac OSX.

I use Safari on OS X and don't have problems. Could you try it on your install with Safari and on demo.redmine.org with Safari and Chrome?

I've found the problem. Its a WebKit-Bug in the last-child selector (which my Redmine theme is using)
