

Redmine - Feature #785

(R)Doc interface

Description I guess a lot of projects used with redmine are written in ruby, a lot of them will have a an RDoc documentation. Now it would be kind sweet if there would be a way to include this into Redmine. Some idea would be to get it from the svn directly or at least be able to point to a directory where to look for it. Just a thought.

I think this would be a great feature for the [Embedded Plugin](#). It already supports Doxygen, Javadoc, and Rcov formats. I think the RDoc frameset is the only difficulty.

#2 - 2016-09-12 20:28 - Benjamin Schunn

I think this ticket should be closed because this features should be implemented in the Embedded Plugin
