

Redmine - Defect #7850

Possible broken JSON REST API

2011-03-13 16:25 - Artem Konoplin

Status:	Closed	Start date:	2011-03-13
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:		Affected version:	1.1.1
Resolution:	Cant reproduce		
Description When i try to create a project using XML all is gone right. For ex.: XML post to /projects.xml: <pre><project name="test123" identifier="test123"/></pre> Answer: RC: 201 Message: Created but when i try to make same thing in JSON format - error is occurred. Ex.: JSON post to /projects.json: <pre>{"project": {"name": "test123", "identifier": "test123"}}</pre> Answer: RC: 500 Message: Internal Server Error			

History

#1 - 2011-03-14 18:48 - Jean-Philippe Lang

You need to provide the error stack trace for your Redmine log.

#2 - 2011-03-14 19:04 - Jean-Philippe Lang

No error with current trunk or 1.1-stable.

#3 - 2011-03-15 05:42 - Artem Konoplin

- File *development.xml.log* added

- File *development.json.log* added

Check again on latest 1.1.2 version. Return code is changed to 422.

RC: 422 Message: null

In attached files development log both from xml (working) and json (non-working).

#4 - 2011-03-24 06:12 - Daniel Gruen

I have similar problems both with redmine-1.1.1 and redmine-1.1.2.

wget my.server.url/projects.xml
works and downloads list of projects correctly

wget my.server.url/projects.json

causes a HTTP/406 error

#5 - 2011-03-24 23:53 - Daniel Gruen

Let me specify this a little more: GETting projects.json causes a HTTP/406 error both with and without API access key. GETting issues.json works both with and without API access key. Either issues.xml or projects.xml work fine. users/current.json causes a HTTP/404 error. This is on a fresh upgrade of redmine-1.1.2 with local gems

actionmailer (2.3.8)
actionpack (2.3.8)
activerecord (2.3.8)
activeresource (2.3.8)
activesupport (2.3.8)
fastthread (1.0.7)
i18n (0.4.2)
mysql (2.8.1)
passenger (2.2.14)
rack (1.0.1)
rails (2.3.8)
rake (0.8.7)

running on Apache/2.2.9 (Debian) Phusion_Passenger/2.2.14 PHP/5.2.6-1+lenny9 with Suhosin-Patch mod_ssl/2.2.9 OpenSSL/0.9.8g.

#6 - 2011-04-03 15:38 - Jean-Philippe Lang

I've just re-checked with current 1.1-stable. GET requests /projects.json or /users/current.json work as expected.

#7 - 2011-04-07 20:26 - Daniel Gruen

Also works for me on a fresh install -- have still no idea what's wrong with the old updated install, though.

#8 - 2020-06-13 01:05 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Cant reproduce
