Target version:		Affected version:	
Resolution:	Invalid		
Description Hope your all well! I have a problem with my stabilizer!Its working for two months now! The problem happened due to the electricity cut down.I asked one of the electrician at my setup and he said it wont work again. So i am requesting another stabilizer so that i may continue with my work.Because for now i cant just connect my computers direct from the electricity source! Regards, Japhet.
