

Redmine - Defect #787

Subversion: Handle failed certificate verification

2008-03-04 22:45 - David Förster

Status:	Closed	Start date:	2008-03-04
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Wont fix		

Description

When the server certificate of the webserver, serving a subversion repository over HTTPS cannot be verified, redmine just fails silently. The expected behaviour is to be prompted whether to accept the certificate anyway or to get the error message displayed at least.

This is the complete error message from the logfile:

```
Processing RepositoriesController#show (for 85.180.74.128 at 2008-03-04 15:04:14) [GET]

History

#1 - 2008-03-10 23:23 - Pim Snel

cal the url using svn from the command line as the user running redmine will fix this. You are asked the accept the certificate and then redmine also works.

#2 - 2008-05-14 18:51 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Wont fix

See [#1235](#) and the [FAQ](#).

This solution works when Redmine was started using command

```
"ruby script/server webrick -e production"
```

but if Redmine was installed as a windows service this solution doesn't work. I can list repository using cmd and typing

```
svn list --xml "https://my_svn_location"@HEAD
```

but at my local redmine site I don't see the repository content.

This is the error message from the log file:

```

```

Does somebody know what is wrong and how to fix this?

#4 - 2009-10-06 10:56 - _emesz_

Ok, I fixed this :)

I changed line 228 in subversion_adapter.rb

Original line was:

```
str << " --no-auth-cache --non-interactive "
```

Changed line looks like this:

```
str << " --no-auth-cache --trust-server-cert --non-interactive "
```

#5 - 2009-10-14 00:38 - Vlad Gurovich

emesz wrote:

Original line was:

[...]

Changed line looks like this:

[...]

unfortunately --trust-server-cert is only available in Subversion 1.6

#6 - 2010-02-25 14:24 - Yar n

- Status changed from Closed to Reopened

so,

ho fix it? %)

--trust-server-cert doesn't work.

saved cert with svn command - and it doesn't work too.

#7 - 2010-02-27 02:44 - Petr Losa

I have a same problem

```
...
No close tag for /lists/list
Line:

<list
  path="https://subversion.losa.cz">
Rendering template within layouts/base
```

#8 - 2010-03-24 15:05 - Rimas Kabašinskas

had same problem here as above with svn 1.5.
solved like this:

edited the redmine/lib/redmine/scm/adapters/subversion_adapter.rb from:

```
#SVN executable name
SVN_BIN = "svn "
```

to

```
SVN_BIN = "svn --config-dir /tmp/subversion_config "
```

don't forget to let access to this dir to redmine user (i'm running redmine as redmine user)

run this command to cache certificate data (replace xxx with your data):

```
su redmine -c 'svn list --config-dir /tmp/subversion_config --xml https://xxx/svn/xxx/trunk'
```

restarted redmine.

#9 - 2010-03-29 08:42 - Petr Losa

hmm, no change, still error:

```

#10 - 2010-06-01 22:27 - Everard Brown

I am also having this problem:
redmine-0.9.3
subversion-1.6.9

Maybe this is a red herring but...

When I run 'svn list -xml' via CLI, there is a long pause in the output exactly at the place where redmine reports the error. Is it possible that the REXML parser is terminating its input due to some kind of time out?

#11 - 2010-06-01 22:49 - Everard Brown

Everard Brown wrote:

It was indeed a red-herring. I switched from mongrel back to WEBrick and it is working again now - if I find out what's up with my mongrel setup I'll

report back.

#12 - 2010-07-07 13:50 - Holger Just

- Status changed from Reopened to Closed

Please open a thread in the forums to get help. The issue tracker is not suited for that.

#13 - 2010-09-27 09:10 - zeerd emneg

Any news for this?

Or it's moved to the forum already -- if so , what's the new url?

Meet the same issues , too .

#14 - 2011-07-12 13:55 - Jose Mari M

Caution, because if the ssl certified is expired the error is the same:

```
# su - redmine -c "svn list --config-dir /tmp/subversion_config --xml https://test.com/svn/project/trunk"
```

...

Certificate information:

- Hostname: test.com

- Valid: from Jun 8 10:15:12 2010 GMT until Jun 8 10:15:12 2011 GMT

...

svn: OPTIONS of 'https://test.com/svn/project/trunk': Server certificate verification failed: certificate has expired, issuer is not trusted (<https://test.com>)

#15 - 2011-08-30 04:19 - Kos Huang

Hi all,

I am confused in this issue for a long time and found a solution finally.

The following web page is the reference.

http://huawuya.blog.hexun.com/62094448_d.html

I did two steps to solve this problem.

1.execute following instruction to let your computer trust SVN Server.

```
svn ls --config-option config:auth:store-auth-creds=yes https://111.222.111.222:8443/svn/myproject
```

2. Modify [redmine]\lib\redmine\scm\adapters\subversion_adapter.rb line 265:

from

```
str << " --no-auth-cache --non-interactive"
```

to

```
str << " --no-auth-cache --non-interactive --config-dir \"%C:/Documents and Settings/myaccount/Application Data/Subversion\""
```

for win7 :

to

```
"--no-auth-cache --non-interactive --config-dir C:/Users/CD-SVN/AppData/Roaming/Subversion"
```

then restart redmine and it worked!!

Hope it will work for your environment.

#16 - 2012-09-03 00:13 - Mario Di Vece

Just wanted to update everyone trying to get this to work: The solution provided by Kos Huang works. (I'm using version 2.0.3)

I tried everything until I bumped into this.

Thanks so much Kos!

#17 - 2013-07-24 16:12 - Luc GIROUX

Solution From Kos Huang worked for me too but with an exception:

I changed `subversion_adapter.rb`

from

```
str << " --no-auth-cache --non-interactive"
```

to

```
str << " --no-auth-cache --trust-server-cert --non-interactive"
```

#18 - 2016-10-17 12:32 - Aleksandar Pavic

I can confirm this issue in:

Environment:

```
Redmine version      2.5.2.stable
Ruby version         1.9.3-p551 (2014-11-13) [x86_64-linux]
Rails version        3.2.19
Environment          production
Database adapter     MySQL2
```

SCM:

```
Subversion           1.8.8
```

With same dump in log file:

```
Error parsing svn output: #<REXML::ParseException: No close tag for /lists/list
```

The expected behavior would be to accept different server certificate.

In my case, certificate had expired, and I replaced it with Lets Encrypt certificate.

The ONLY solution that worked for me:

1. logged in as redmine user to server console (`su - myredmineuser`)
2. performed `svn list` <https://myRedmineRepo>
3. accepted certificate permanently
4. logged in back to my Redmine and clicked on repository - now working

#19 - 2016-10-17 15:02 - Aleksandar Pavic

Update, supposigly SVN 1.9 does have a new flag for this:

```
--trust-server-cert      : deprecated; same as --trust-server-cert-failures=unknown-ca
--trust-server-cert-failures ARG : with --non-interactive, accept SSL server
                              certificates with failures; ARG is comma-separated
                              list of 'unknown-ca' (Unknown Authority),
                              'cn-mismatch' (Hostname mismatch), 'expired'
                              (Expired certificate), 'not-yet-valid' (Not yet
                              valid certificate) and 'other' (all other not
                              separately classified certificate errors).
```

So in my case, change in `svn_adapter.rb` should be:

```
str << " --no-auth-cache --trust-server-cert-failures=cn-mismatch --non-interactive"
```
