

## Redmine - Feature #788

### More my page configurability

<b>Description</b> Is there any possibility of being able to embed more things into the "My page" starting point. It'd be nice, for example, to be able to add a wiki "widget", which can show a wiki page, and also an activity one to be able to view at a glance all activity in the projects you're interested in.

- % Done changed from 0 to 100

It seems be resolved. I'm closing ;?)

I don't think either of the things I mentioned are possible yet (at least on redmine.org). Seems to be the same functionality as before - issues, news, calendar etc. Doesn't really matter at any rate.

#### #3 - 2013-01-15 22:38 - Jan Niggemann (redmine.org team member)

- Status changed from Resolved to Closed

Closing this, status is resolved since 400 days and more (issue was last updated more than 400 days ago)...

Well there are some patches which give extended MyPage blocks. Request those blocks directly, can cause a new block integration.
