Description		
submit issue on behalf of other user.		
it's useful feature for registration tasks by phone, by example.		
PS: it's a good tool, thanks!

I'm migrating bugs manually from our old database (Bugzilla) and it would be great if I had this feature.

"Related to Feature #1739: Add ability to change issue owner added"
I do not think it is same meaning.
When you open Issue on behalf of another person in author of the issue there must be shown like "Peter on behalf of Vasya" and Vasya receives emails as author.
