

Redmine - Defect #792

Bad URLs for static pages when Redmine is not installed at the server's root

2008-03-05 17:17 - Martin Kirchgessner

Status:	Closed	Start date:	2008-03-05
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Wiki	Estimated time:	0.00 hour
Target version:	0.7	Affected version:	
Resolution:			
Description			
<p>My Redmine installation runs fine on https://mydomain.com/redmine/. Redmine is running on a Mongrel cluster, behind Apache.</p> <p>There is a "Help" link at the top right of the wiki edition page:</p> <pre><%= link_to l(:label_help), '/help/wiki_syntax.html', :onclick => "window.open('{ url_for '/help/wiki_syntax.html' }', '', 'resizable=yes, location=no, width=300, height=640, menubar=no, status=no, scrollbars=yes'); retur n false;" %></pre> <p>So when I click on "Help" my browser goes to https://mydomain.com/help/wiki_syntax.html, which of course gives a 404 error.</p> <p>Note that https://mydomain.com/redmine/help/wiki_syntax.html works but all contained images also have erroneous URLs.</p>
